

## Delhi Public School Megacity, Kolkata

Class 4 Session 2026-27

Subject: Social Studies

Topic: Types and Elements of Map

Please note that all assignments will be completed in the presence of the subject teacher during class hours. Students are not allowed to copy these assignments into their exercise books in advance. In case of absence, students may refer to the assignments to ensure that their work is up to date.

**Q1) Define the following and paste pictures:**

i) **Map** ii) **Globe**

Ans i) A map is a representation or a drawing of the earth's surface, or a part of it, on a flat surface, according to the scale. It helps us identify the places and locations within an area helping us to navigate from one place to another. It represents continents, countries, cities and their boundaries and other landforms and water boundaries.

ii) A globe is a spherical representation of the Earth. It's a three-dimensional sphere which represents the whole earth. It shows us the shape and location of the continents, oceans, countries, and the location of the important cities.

**Q2) Differentiate between:**

i) **Political Map and Thematic Map (paste pictures)**

ii) **Scaling up and Scaling down**

Ans i)

| Political Map                                                                                                                                                                                              | Thematic Map                                                                                                      |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------|
| These maps show the boundaries of countries, states and districts and the location of major cities. Different kinds of lines are used to show the boundaries between countries and those within a country. | These maps give information about special topics or themes like rainfall, crops, industries, roads, railways etc. |

Ans ii)

| Scaling up                                                                                              | Scaling Down                                                                                        |
|---------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------|
| When we find out the actual distance of a place by using the scale of a map, it is known as scaling up. | The method of drawing an accurate representation using the scale of a map is known as scaling down. |

**Q3) Give reasons for the following statement:**

i) **Maps are easy to carry.**

Ans) Maps are easy to carry as they are usually flat and lightweight. Paper maps can be folded to fit into a bag or pocket. They don't need any power or device to use. Even digital maps on a phone take very little space.

ii) **Symbols are used in a map. (Diagram to be drawn in their exercise book)**

Ans) A symbol is a shape or sign that is used to represent something. The use of colours and symbols allow a large amount of information to be included in a map without making it cluttered. These symbols help us in identifying what exists in a place and in which direction they are located. These symbols are also known as conventional signs.

|       |                        |
|-------|------------------------|
| ⊛     | Country capital        |
| ⊙     | State capital          |
| ⊙     | Other towns            |
| — • — | International boundary |
| ----  | State boundary         |
| ~~~~~ | River                  |
| ▲     | Peak                   |

**Q4) State the importance of directions on a map. (Diagram to be drawn in their exercise book)**

Ans) Directions is one of the most important elements in a map. It helps us to orient or line up the map so that the north on the map is pointing to north on the land. When a map is correctly lined up, it becomes easier to interpret and follow the map. The four main directions are-North, South East and West.
