

Delhi Public School Megacity, Kolkata

Class 4 Session 2026-27

Subject: Social Studies

Topic: The Iron Age

Please note that all assignments will be completed in the presence of the subject teacher during class hours. Students are not allowed to copy these assignments into their exercise books in advance. In case of absence, students may refer to the assignments to ensure that their work is up to date.

Answer the following questions:

Q1) Define the following terms:

(a) steel: It is a strong hard metal that is made of a mixture of iron and carbon.

(b) territory: Territory is a land that is under the control of a particular country or ruler.

Q2) Why trade became an important activity during the Iron Age?

Ans) Trade was important during the Iron Age because people needed to exchange goods and resources that they didn't have. With the use of iron tools, people were able to produce more food and goods, which led to trade with other regions.

Q3. How do you think people's lives changed when they started using iron tools?

Ans) Children will write their own answer.

Expected Answer: People started using iron tools, their lives changed in many ways. They were able to clear forests and farm more land, which meant they had more food to eat. They were also able to make better tools and weapons, which helped them build stronger homes and protect themselves.

Q4) Why do you think the Hittites wanted to keep the knowledge of iron a secret?

Answer: Children will write their own answer

Expected Answer: The Hittites might have wanted to keep the knowledge of iron a secret because they wanted to have an advantage over other people. If they were the only ones who knew how to make iron tools and weapons, they would be stronger and more powerful than others.

Q5) Discuss the life of people during copper and bronze age.

Ans: Various civilizations began to develop in Copper and Bronze age; they had good agriculture and cities. The river-based civilizations belonged to this period. Cities and civilizations traded amongst themselves to get the goods that they needed.

Q6) Name few important cities from Greek Civilization.

Ans: Athens, Sparta, Marathon were the few important cities in Greek Civilization.

Q7) Give reason-

a) Some cities of this period were very grand, with magnificent buildings.

Ans: Cities developed during the Iron Age because the use of iron tools led to increased food production, which allowed for population growth and the development of larger settlements.

Q8) Case Study:

A village is located near Red River and has an abundance of iron ore. The villagers have just discovered how to extract iron from the ore. For a long time, the people used tools made of stone and wood, which often wore out or broke during hard work. Now, the discovery of this strong, shiny metal is about to change the way everyone in the village lives and works.

i) Name the tools the villagers can make with the extracted iron.

Ans: The villagers could make tools like axes, ploughshares, sickles, and knives using the extracted iron.

ii) How could the villagers use iron to improve their farming practices?

Ans: The villagers could use iron tools like plough shares and sickles to make farming easier and more efficient, allowing them to grow more crops and increase their food production.

iii) What could be the long-term benefits of the villagers' discovery of iron extraction?

Ans: The long-term benefits of the villagers' discovery of iron extraction could be the growth of their village into a larger settlement or town, increased trade and economic prosperity, and the development of new technologies and industries that rely on iron.
