SESSION 2026-27

CLASS IV

ENGLISH LITERATURE PROJECT

TOPIC: The “Hanging Garden Tree House”: A Model of Coexistence.

TO BE DONE AT HOME

Based on the poem “A Home Song”, “The Hanging Garden Tree House” demonstrates how humans and plants can live together harmoniously. The project focuses on sustainable architecture, biodiversity (wildlife) and the importance of green spaces in our living environments.

MATERIALS REQUIRED: Mount Board: To be used as the base (painted to represent a water body or forest floor).

Building Materials: Popsicle sticks (for the platform), toothpicks (for the tree house as shown in the picture).

Green Features: Green yarn or green tissue paper (for creepers), tiny bottle caps, real soil, and sprouts.

Decorative Wildlife: Green beads and wire (for a caterpillar), felt or clay (for a sloth).

General Tools: Glue, scissors, pipe cleaners and old newspapers for cardboard reinforcement.

PROCEDURE: Base Preparation: Paint your mount board so that it looks like a natural environment.

Structural Build: Construct a 12-inch 3D platform using popsicle sticks. Build a "trellis" roof using toothpicks instead of a solid cover.

Nature Integration: Drape green yarn or tissue paper "creepers" over the house. Fill bottle caps with soil and a sprout to create a rooftop garden.

Wildlife Placement: Create a bead caterpillar and a clay sloth/ monkey/ bird/ butterfly; place them on the leaves and vines to show animals sharing the space.

PROJECT LAYOUT: **Top:** 3D "Hanging Garden" model (12 inches).

Middle: Student Name, Class and Section.

Bottom: A paragraph explaining the reason/importance of this habitat (Co-existence of human and nature).

DATE OF PROJECT SUBMISSION: 30.6.2026
