WORKSHEET

CLASS IV

SCIENCE

TOPIC: FRICTION AS A FORCE

Name: _____ **Class:** _____ **Sec:** _____ **Date:** _____

Section A: Name the Following

1. The force that comes into action when two objects or surfaces are in contact. _____
2. A substance that is used to reduce friction. _____
3. The type of surface that produces less friction. _____
4. A simple device used to reduce friction while moving objects. _____
5. The force that helps us to walk without slipping. _____

Section B: Fill in the Blanks

1. The force that opposes motion between two surfaces is called _____.
2. _____ surfaces produce more friction than smooth surfaces.
3. Oil and grease help to _____ friction.
4. Friction produces wear and _____ of objects.
5. Friction makes our hands _____ when we rub them together.

Section C: Complete the table:

S.No.	Situation	Helpful / Harmful
1.		Helpful
2.	Wear and tear of shoes	
3.		Helpful
4.	Lighting a matchstick	
5.		Harmful

Section D: HOTS

1. Powder is used both to increase friction and to decrease friction. What type of powder increases friction and what type decreases friction?

2. Piyash tries to slide a book on glass and then on sandpaper. On which surface will the book stop sooner, why?
